Notice to Reader:

These condensed consolidated interim financial statements of Carlin Gold Corporation (the “Company”) have been prepared by management and reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors of the Company. In accordance with National Instrument 51-102 released by the Canadian Securities Administrators, the Company discloses that its external auditors have not reviewed these condensed consolidated interim financial statements, notes to financial statements and the related quarterly Management Discussion and Analysis.

Condensed Consolidated Interim Statements of Financial Position

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Carlin Gold Corporation (the “Company”) is registered under the British Columbia *Business Corporations Act* and trades on the TSX Venture Exchange. The Company is in the business of acquiring, exploring and developing mineral properties in Nevada and Yukon, and has not yet determined whether its properties contain ore reserves that are economically recoverable. The head office and principal address of the Company is situated at Suite 320 – 800 West Pender Street, Vancouver, British Columbia, Canada, V6C 2V6.

The Company has not generated any revenue since inception, has never paid dividends and is unlikely to pay dividends or generate earnings in the immediate or foreseeable future. During the nine months ended September 30, 2019, the Company incurred a net loss of \$19,777 (2018 - \$119,928) and as at September 30, 2019 the Company has a working capital deficiency of \$275,055 (December 31, 2018 – \$243,806 deficiency). The continuation of the Company as a going concern is dependent upon the ability of the Company to obtain necessary equity financing to continue operations and to determine the existence, discovery and successful exploitation of economically recoverable reserves in its mineral properties, confirmation of the Company’s interests in the underlying properties and the attainment of profitable operations, or realize proceeds from their sale.

The ability of the Company to continue as a going concern and meet its commitments as they become due, including completion of the acquisition, exploration and development of its mineral property interests, is dependent on the Company’s ability to obtain the necessary financing. The Company will require additional capital to finance future operations and growth. If the Company is unable to obtain additional financing, the Company would be unable to continue. There can be no assurance that management’s plans will be successful.

The business of mineral exploration involves a high degree of risk and there is no assurance that current exploration projects will result in future profitable mining operations. The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead, pay its liabilities and maintain its mineral interests. The recoverability of amounts shown for exploration and evaluation properties is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of these exploration and evaluation properties, and establish future profitable production, or realize proceeds from the disposition of exploration and evaluation properties. The carrying value of the Company’s exploration and evaluation properties does not reflect current or future values.

These matters indicate the existence of material uncertainties that may cast significant doubt about the Company’s ability to continue as a going concern. These consolidated financial statements do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

2. BASIS OF PRESENTATION

a) Statement of compliance

The accompanying condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”). The accounting policies, methods of computation and presentation applied in these Condensed Consolidated Interim Financial statements are consistent with those of the previous financial year.

b) Approval of condensed consolidated interim financial statements

These condensed consolidated interim financial statements of the Company for the nine months ended September 30, 2019 and 2018 were approved and authorized for issue by the Board of Directors on November 27, 2019.

These condensed consolidated interim financial statements include the accounts of the Company and its 100% controlled entity, Carlin Gold US Inc. (a Nevada corporation).

Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

c) Judgments and estimates

The preparation of these condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenues and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances and which form the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company has classified its cash and marketable securities as FVTPL; and trade payables and accrued liabilities, loan payable to related party and other amounts due to related parties, as other financial liabilities.

Fair value

The carrying values of trade payables and accrued liabilities, and amounts due to related parties all approximate their fair value due to the short-term nature of these financial instruments.

At September 30, 2019 and 2018, the marketable securities are valued using quoted prices (unadjusted) from an active market (Level 1).

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

The principal risks to which the Company's financial instruments are exposed are described below.

a) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk on its cash. However, this risk is minimized as all amounts are held with major Canadian and American financial institutions. The Company's concentration of credit risk and maximum exposure thereto is as follows:

	September 30 2019	December 31 2018
Cash – Canada	\$ 13,743	\$39,826
Cash – USA	4,566	8,590
Total	\$ 18,309	\$ 47,876

b) Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they become due. The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities.

The Company is dependent on raising funds through the issuance of shares, obtaining debt financing and/or attracting joint venture partners in order to undertake further exploration and development of its mineral properties and finance office and administrative expenditures. There can be no assurance the Company will be able to raise funds in the future.

The Company owns marketable securities, which are recorded as FVTPL. The Company may, from time to time, liquidate a portion of its holdings depending on market conditions and the Company's cash requirements. Depending on timing, the Company's ability to liquidate these securities is subject to price fluctuations and market conditions, which may affect the Company's ability to liquidate the securities in a timely manner.

At September 30, 2019, the Company had trade payables totaling \$79,855 (December 31, 2018 - \$54,886), which are currently due and loans payable to a related party and other amounts due to related parties totaling \$402,365 (December 31, 2018 - \$346,923).

Notes to Condensed Interim Consolidated Financial Statements
 For the nine months ended September 30, 2019 and 2018
 (Expressed in Canadian dollars)

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

The Company is not exposed to significant interest rate risk. The Company's bank accounts earn interest at variable rates. Future cash flows from interest income on cash will be immaterially affected by interest rate fluctuations.

(ii) Foreign currency risk

As at September 30, 2019, certain of the Company's financial instruments are held in US dollars. The Company has operations in Nevada, USA. As a result, the Company is exposed to foreign currency risk from fluctuations between the Canadian and US dollar.

The Company does not use derivatives or similar techniques to manage currency risk.

As at September 30, 2019, the Company is exposed to foreign currency risk on US\$3,517 (December 31, 2018 - US\$6,297) cash.

(ii) Other price risk

Other price risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from currency risk or interest rate risk. The Company's marketable securities are carried at market value and are, therefore, directly affected by fluctuations in the market value of the underlying securities. The Company's sensitivity analysis suggests that a 125% (2018 - 125%) change in market prices would change other comprehensive income/loss by approximately \$115,000 (2018 - \$238,000).

4. MARKETABLE SECURITIES

At September 30, 2019 and December 31, 2018, the Company owned the following AFS investment:

	September 30, 2019			December 31, 2018		
	Number of Shares	Cost	Fair Value	Number of Shares	Cost	Fair Value
Constantine Metal Resources Ltd.*	250,000	-	80,000	250,000	-	\$107,500
HighGold Mining Inc.	83,333	-	95,833	-	-	-
Fireweed Zinc Ltd.	25,000	16,750	11,250	-	-	-

* In May 2018, the shares of Constantine Metal Resources were consolidated on a one-new-for-four-old basis, which resulted in a restating of the number of shares owned by the Company, from 1,000,000 to 250,000 shares.

Notes to Condensed Interim Consolidated Financial Statements
 For the nine months ended September 30, 2019 and 2018
 (Expressed in Canadian dollars)

4. MARKETABLE SECURITIES (Continued)

In August 2019, the Company received 83,333 shares of HighGold Mining Inc. as a result of the spinout of HighGold Mining Inc. from Constantine Metal Resources Ltd.

In the nine months ended September 30, 2019, the Company recorded a gain of \$62,833 relating to the fair value change of its investments.

Constantine is related to the Company through a common director (Mr. K. Wayne Livingstone and a common officer (Mr. Aris Morfopoulos). The Company's investment in Constantine represents an ownership interest of 0.56% at September 30, 2019 (December 31, 2018 - 0.57%).

5. EXPLORATION AND EVALUATION PROPERTIES

The following is a summary of the Company's exploration and evaluation properties:

	Cortez Summit	JDS	Willow	Whisky Canyon	Yukon	Total
Balance, December 31, 2017	\$ 1,715,204	\$ 1	\$ 1	\$ 1	\$ 1	\$ 1,715,208
Acquisition costs	\$ 30,739	\$ 16,674	\$ 19,284	\$ -	\$ 4,800	\$ 71,497
Geological and maintenance	19,175	197	12,303	1,349	2,189	35,213
Writedown of exploration and evaluation property	-	(16,871)	(31,587)	(1,349)	(6,989)	(56,796)
Balance, December 31, 2018	\$ 1,765,118	\$ 1	\$ 1	\$ 1	\$ 1	\$ 1,765,122
Acquisition costs	\$ 8,383	\$ -	\$ 6,229	\$ -	\$ -	\$ 14,612
Geological and maintenance	33,421	5,317	11,084	-	825	50,647
Writedown of exploration and evaluation property	-	(5,317)	(17,313)	-	(825)	(23,455)
Balance, September 30, 2019	\$ 1,806,922	\$ 1	\$ 1	\$ 1	\$ 1	\$ 1,806,926

a) Cortez Summit Property, Nevada USA

The Company owns a 100% interest in claims in the Cortez gold trend in Eureka County, Nevada, which were acquired by staking and are not subject to any royalties.

In February 2018, Barrick terminated the Exploration and Earn-in Agreement it had with the Company regarding the Cortez Summit property.

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

5. EXPLORATION AND EVALUATION PROPERTIES (Continued)

b) Recovery of Exploration Costs

Yukon Joint Venture Property

In April 2018, the Carlin-Constantine Metal Resources Ltd. (CEM-TSXV) Joint Venture (“CCJV”) completed an agreement granting Fireweed Zinc Ltd (FWZ-TSXV) (“Fireweed”) the option to purchase the CCJV’s Jerry, MC and MP properties (total 624 claims) in the Mac Pass area, Yukon. Total consideration for Fireweed to acquire a 100% interest in the properties includes an aggregate of \$500,000 in cash and issuance of 300,000 common shares of Fireweed Zinc, to be paid over three years. The agreement includes a net smelter return royalty (“NSR”) of 0.5 % on base metals and silver and a 2.0% NSR on all other metals. An additional payment of \$750,000 is payable upon Fireweed producing an indicated resource of 2.0 million tonnes on the optioned properties. In May 2019, the Company received its second payment from the Agreement, which consisted of \$62,500 cash and 25,000 shares of Fireweed valued at \$16,750. The Company recorded the proceeds as a recovery of exploration costs previously written off.

c) Closure costs

The Company has assessed that it does not have any closure costs as at the date of this report.

d) Realization of assets

The investment in and expenditures on exploration and evaluation properties comprise a significant portion of the Company’s assets. Realization of the Company’s investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or proceeds from their disposal.

Resource exploration and development are highly speculative and contain inherent risks. While the rewards if an ore body is discovered can be substantial, few properties that are explored are ultimately developed into producing mines. There can be no assurance that current exploration programs will result in the discovery of economically viable quantities of ore.

The amounts shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values. These costs will be depleted over the useful lives of the properties upon commencement of commercial production or written off if the properties are abandoned or the claims allowed to lapse.

e) Write-down of exploration and evaluation property costs

During the nine months ended September 30, 2019, the Company incurred write-down costs totaling \$23,455 (2018 - \$37,752) on exploration properties, in accordance with Level 3 of fair value hierarchy.

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

5. EXPLORATION AND EVALUATION PROPERTIES (Continued)

f) Environmental

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

Environmental legislation is becoming increasingly stringent, and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions.

If the restrictions adversely affect the scope of exploration and development on the mineral property interests, the potential for production on the property may be diminished or negated.

g) Title to mineral property interests

Although the Company has taken steps to verify title to its exploration and evaluation properties, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

6. PAYABLE TO RELATED PARTY

In August 2018, the Company obtained a demand loan for \$65,940 (\$50,000 US) from Mr. K. Wayne Livingstone, president of the Company, for the purposes of paying claim fees that were due on the Company's US mineral properties and general working capital. The loan amount is subject to 10% interest per annum, and a total of \$3,615 interest expense has been incurred for the nine months ended September 30, 2019. In May 2019, the Company repaid an amount of \$45,551 on the loan. As at September 30, 2019, a total of \$26,497 is owing for outstanding principal and accrued interest on the loan. The loan is unsecured and payable on demand.

7. SHARE CAPITAL

a) Authorized: unlimited number of common shares without par value

Issued and outstanding: 88,939,464 (2018 – 88,939,464) common shares

The Company did not grant any stock options during the nine months ended September 30, 2019.

Notes to Condensed Interim Consolidated Financial Statements
 For the nine months ended September 30, 2019 and 2018
 (Expressed in Canadian dollars)

7. SHARE CAPITAL (Continued)

b) Stock options

The Company has established a share purchase option plan whereby the Board of Directors may, from time to time, grant options to directors, officers, employees or consultants. Options granted must be exercised no later than five years from the date of grant or such lesser period as determined by the Company's Board of Directors. The exercise price of an option is not less than the closing price of the stock on the last trading day preceding the grant date. The maximum number of options to be granted under this plan is 8,893,946.

A summary of the status of the Company's stock options at September 30, 2019 and December 31, 2018 and changes during the periods then ended are as follows:

	September 30, 2019		December 31, 2018	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding, beginning of year	8,050,000	\$0.06	8,050,000	\$0.06
Granted	-	-	-	-
Outstanding, end of period	8,050,000	\$0.06	8,050,000	\$0.06

A summary of the Company's stock options as at September 30, 2019 is as follows:

Expiry Date	Weighted Average Exercise Price	Number of Options Outstanding	Weighted Average Remaining Contractual Life (in years)	Number of Options Exercisable (vested)
February 26, 2021	\$0.05	5,500,000	1.41	5,500,000
September 12, 2022	\$0.08	2,550,000	2.95	2,550,000
		8,050,000		8,050,000

A summary of the Company's stock options as at December 31, 2018 is as follows:

Expiry Date	Weighted Average Exercise Price	Number of Options Outstanding	Weighted Average Remaining Contractual Life (in years)	Number of Options Exercisable (vested)
February 26, 2021	\$0.05	5,500,000	2.16	5,500,000
September 12, 2022	\$0.08	2,550,000	3.70	2,550,000
		8,050,000		8,050,000

Notes to Condensed Interim Consolidated Financial Statements
For the nine months ended September 30, 2019 and 2018
(Expressed in Canadian dollars)

8. RELATED PARTY TRANSACTIONS

Key management personnel compensation consists of the Chief Executive Officer, Chief Financial Officer (“CFO”) and the Vice-President of Exploration. Aggregate compensation for the nine months ended September 30, 2019 was \$125,888 (2018 - \$124,760) for management and other fees, as described below.

The Company accrued a total of \$45,000 (2018 - \$45,000) for management and administration services to NS Star Enterprises Ltd., a company controlled by the president, during the nine months ended September 30, 2019. The Company accrued a total of \$45,000 for accounting, management and administration services to Morfopoulos Consulting Associates Ltd., a company controlled by the CFO, during the nine months ended September 30, 2019 (2018 - \$45,000). The Company paid or accrued a total of \$35,888 (2018 - \$34,760) from Mr. Robert Thomas, Vice-President of Exploration, for technical consulting and management and administration services during the nine months ended September 30, 2019.

As at September 30, 2019, a total of \$126,116 (December 31, 2018 - \$89,894) is due to director Mr. Thomas for fees, technical consulting services and expenses incurred on behalf of the Company. As at September 30, 2019, a total of \$130,000 (December 31, 2018 - \$85,000) is due to NS Star Enterprises Ltd. for management and administration services. As at September 30, 2019, a total of \$130,000 (December 31, 2018 - \$85,000) is due to Morfopoulos Consulting Associates Ltd. for accounting, management and administration services. As at September 30, 2019, a total of \$18,839 (December 31, 2018 - \$18,014) is due to Constantine for rent and Yukon joint venture expenses. All of the above amounts are unsecured, without interest or stated terms of repayment.

At December 31, 2018, the Company had an unsecured loan from Mr. K. Wayne Livingstone, president and director of the Company, totaling \$68,433 in principal and accrued interest. The loan is payable on demand (Note 6) at an interest rate of 10% per annum. In May 2019, the Company repaid an amount of \$45,551 on the loan. As at September 30, 2019, a total of \$26,497 is owing for outstanding principal and accrued interest on the loan.

9. MANAGEMENT OF CAPITAL

The Company manages its common shares, stock options and warrants as capital (Note 7). There has been no change in the nature of the Company’s capital during the period ended September 30, 2019. The Company’s objectives when managing capital are to safeguard the Company’s ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure, which optimizes the costs of capital at an acceptable risk. The Company does not have any externally imposed capital restrictions.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

Description of Business and Report Date

The information in this Management's Discussion and Analysis ("MD&A") is intended to assist the reader in the understanding and assessment of the trends and significant changes in the results of operations and financial conditions of Carlin Gold Corporation (the "Company" or "Carlin"). This MD&A should be read in conjunction with the unaudited condensed consolidated interim financial statements of the Company, including the notes thereto, for the nine months ended September 30, 2019 and 2018 and the audited financial statements of the Company for the years ended December 31, 2018 and 2017, and MD&A of such financial statements, and other information relating to the Company on file with the Canadian provincial securities regulatory authorities on SEDAR at www.sedar.com. The Company's audited financial statements for the years ended December 31, 2018 and 2017 have been prepared in accordance with International Financial Reporting Standards ("IFRS"). This MD&A has taken into account information available up to and including November 27, 2019. All monetary units herein are expressed in Canadian dollars unless otherwise noted.

Carlin is an exploration stage company engaged in the identification, evaluation, acquisition and exploration primarily of gold properties in Nevada, USA and Yukon, Canada. The Company is a reporting issuer in British Columbia and Alberta, and trades on the TSX Venture Exchange under the symbol CGD.

This MD&A contains forward-looking statements. Please refer to the cautionary language at the end of this document.

Company Overview

Marketable Securities Received from Spinout of Constantine Properties

In August 2019, the Company received 83,333 shares of HighGold Mining Inc ("HighGold") as a result of the spinout of HighGold from Constantine Metal Resources Ltd. The Company received one share of HighGold for every three shares of Constantine that it held at August 1, 2019. The Company's HighGold shares have a value of \$104,166 as of the date of this report.

Option Payment Received for Yukon Properties

In May 2019 the Company received the second annual option payment from Fireweed Zinc Ltd. ("Fireweed") regarding the option agreement on some of the Company's Yukon Properties, which consisted of \$62,500 cash and 25,000 common shares of Fireweed.

Cortez Summit Property

The Company entered into an Exploration and Earn-In agreement with Barrick Gold Exploration Inc. ("Barrick") on the Cortez Summit property ("Cortez Summit" or the "Property") in November 2016. In July 2017, Barrick completed an initial core hole, SJV17-1D (vertical) to a depth of 5,171 ft. (1576 m). SJV17-1D was collared in the southwest portion of the Property in the vicinity of Carlin's previous shallow reverse circulation holes drilled in 2012 into upper plate lithologies, adjacent to an area referred to by Carlin geologists as the Fourmile structural corridor, a wide north-northwest trending zone defined by geological, geochemical and geophysical data.

On February 15, 2018, Barrick terminated the Exploration and Earn-In agreement, after completing one hole. SJV17-1D encountered a 592 ft. (180 m) interval of highly anomalous arsenic at 328-920 ft. (100-280 m) averaging 480 ppm, with strongly anomalous Carlin-style pathfinder elements including mercury (to 17 ppm),

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

antimony (to 173 ppm) and thallium (to 6.3 ppm). Gold values include a 10 ft. (3 m) wide zone at 694-704 ft. (211-214 m) grading 2.6 grams/tonne (gpt). This thick anomalous interval is contained in upper plate rocks consisting of variably clay-altered, iron-oxide stained, brecciated hornfels and lesser mudstone/siltstone, with the most intense clay alteration and iron-oxide development at 652-798 ft. (199-243m.). Modest zones of anomalous arsenic and thallium occur further down the hole, including a 415 ft. (127 m) interval of anomalous thallium straddling the base of the Roberts Mountain Thrust. Local zones of brecciation, carbon development, and minor decalcification were also observed. No significant gold mineralization was encountered in the lower plate carbonate section.

Although the lack of gold mineralization in the lower plate portion of hole SJV17-1D was disappointing, the Company is encouraged by the presence of intense alteration, thick intervals of anomalous Carlin-type pathfinder elements and elevated gold values in upper plate rocks along the Fourmile structural corridor. Carlin's 2012 drilling encountered similar alteration and anomalous geochemistry, although to a lesser degree. Carlin geologists believe that this "shallow" zone penetrated in SJV17-1D potentially represents a mineralized structural conduit which could be used as a guide to target deeper gold mineralization in the receptive Devonian-age lower plate carbonate rocks.

Cortez Summit represents an excellent mining exploration opportunity located within one of the most well-endowed gold regions in North America. The Property has only been partially explored, as drilling to date has tested only a small portion of the ground in the southwest corner of the 4 square mile claim block. Several additional quality targets require evaluation.

SJV17-1D is the only drillhole to have fully penetrated the favorable lower plate section that hosts Barrick's nearby Goldrush reserve/resource and "Fourmile"* discovery (see below). Hornfels alteration in upper plate rocks has been encountered in most of the Carlin/Barrick drill holes drilled on the Property, which is likely produced by the thermal effects of the nearby Jurassic age Mill Canyon quartz monzonite stock. The thermal contact zone around this stock is an important geological control of Barrick's high grade mineralization at their "Fourmile" discovery. This geological environment appears to extend east onto Cortez Summit and into the influence of the Company's northwest trending Fourmile structural corridor target. The Company is evaluating future exploration plans at Cortez Summit.

**Note: Quotation marks used around "Fourmile" are to distinguish the area of Barrick's high grade gold intersections on Barrick's property adjacent to Cortez Summit from the Fourmile structural corridor interpreted by Carlin geologists on the southwest portion of the Cortez Summit Property.*

A Focus on Nevada Properties

In addition to Cortez Summit, the Company controls one other Carlin-style target in Nevada by direct ownership of unpatented mining claims. Willow (47 claims) is located in an active exploration and mining area in northeast Nevada, highlighted by Newmont Goldcorp Corporation's ("Newmont") Long Canyon mine located 80 kilometers southwest.

Option Agreement on Company's Yukon Property

On April 23, 2018, the Carlin – HighGold Mining Inc. ("HighGold") Joint Venture executed an agreement granting Fireweed Zinc Ltd. (FWZ-TSXV) ("Fireweed") the option to purchase the joint venture's Jerry, MC and MP properties (total 624 claims) in the Mac Pass area, Yukon. Total consideration for Fireweed to acquire a 100% interest in the properties includes an aggregate of \$500,000 in cash and issuance of 300,000 common shares of Fireweed, to be paid over three years. The agreement includes a net smelter return royalty ("NSR")

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

of 0.5 % on base metals and silver and a 2.0% NSR on all other metals. An additional payment of \$750,000 is payable upon Fireweed producing an indicated resource of 2.0 million tonnes on the optioned properties. The claims were staked in 2011 under the joint venture, and all option payments and royalties will be split 50% payable to Carlin and 50% payable to HighGold. In May 2018 the Company received its portion of the first payment from Fireweed, consisting of \$37,500 cash and 25,000 common shares of Fireweed. In May 2019 the Company received its portion of the second payment from Fireweed, consisting of \$62,500 cash and 25,000 common shares of Fireweed. Fireweed's Macmillan Pass Project contains a significant zinc-lead-silver endowment, and Fireweed currently reports an indicated and inferred resource containing 50.67 million tonnes grading 6.01% zinc, 2.99% lead, and 34.43 g/t silver (February 2018 NI43-101 report posted on sedar.com). This resource is contained within an area that Fireweed refers to as the "fertile corridor", a zone that their maps show extending onto the CCJV's Jerry claims (project maps on www.fireweedzinc.com).

Cortez Summit Exploration Project, Nevada U.S.A.

The Company's 100% owned Cortez Summit Property is centrally located on the Cortez Trend, within what has become one of the most active gold exploration areas in Nevada. The Cortez Trend contains a major gold endowment that exceeds 50 million oz. total gold produced, reserves and resources (Nevada Bureau of Mines and Geology annual mineral reports, Barrick annual reports). Barrick's Cortez Hills operation (11 million oz gold pre-production reserve/resource) lies 4.0 miles (6.4 km) west of the Property. Plans are underway to expand underground mining at Cortez Hills into the Deep South area, which is below the currently permitted mining activity (Barrick news release Feb. 15, 2017). Barrick submitted a draft Environmental Impact Statement in October 2018.

The Cortez Summit Property consists of 142 unpatented claims located in the southern Cortez Mountains in Eureka County, Nevada, between the historic Buckhorn and Horse Canyon mines. Cortez Summit is located within 1 kilometer of Barrick's Goldrush reserve/resource and "Fourmile" discovery. Barrick reports that, as of year-end 2018, the probable reserve at Goldrush stood at 1.99 million oz grading 9.7 gpt, and the measured and indicated resource was 9.35 million oz grading 9.4 gpt with an inferred resource of 3.55 million oz grading 9.3 gpt, for a total measured/indicated/inferred resource of 12.9 oz (Barrick 2018 annual report). This resource figure includes an initial inferred resource at Fourmile of 0.7 million oz grading 18.58 gpt. Barrick has advanced Goldrush through the prefeasibility stage, and envisions annual underground production of 450,000 oz at average AISC of US\$665/oz. Barrick contemplates a mine life of 21 years with production beginning as early as 2021. Development for the 4000 m twin exploration declines to access the ore body commenced in 2017 and decline construction has advanced to 1200 m (Barrick Q2 2019 webcast). On March 11, 2019 Barrick and Newmont Goldcorp Corporation announced a joint venture agreement "combining their respective mining operations, assets, reserves, and talent in Nevada." Nevada Gold Mines is to be operator and own 61.5% of the joint venture. Goldrush is among the included assets, and at this time Fourmile is excluded, although "may be included at a later date if the required investment hurdles are satisfied." (news release on Barrick web site www.barrick.com)

The Property is contiguous with Barrick claims on all sides and on the west boundary adjoins the Goldrush development project and the "Fourmile" discovery described by Barrick in its February 22, 2016 News Release. Barrick has completed additional drill holes on Fourmile, which has further delineated and expanded the mineralized area. Barrick has also announced a new trend – the north-northwest Blasdel trend, which they show as being parallel to their "Fourmile" mineralized zone and the Fourmile structural corridor at Cortez Summit (Barrick Q3 2018 webcast).

Carlin's primary target at Cortez Summit is Carlin-style mineralization in a structural and stratigraphic setting similar to that at the neighboring Goldrush reserve/resource. Much of this target is blind, being covered by

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

Miocene-age post-mineral basaltic andesite and interlayered gravels. The Fourmile structural zone trends north-northwest for 4,500 ft. (1,370 m) within the southwestern part of the Property, and extends an additional 4 miles (6.5 km) on Barrick property to the north. Barrick geologists have mapped a pattern of surface alteration and have defined geochemical anomalies spatially associated with this structural zone (Barrick 2017 Q4 webcast). At Cortez Summit, Carlin geologists encountered a similar alteration and geochemistry pattern in limited upper plate rock exposures along the Fourmile structural zone on the west edge of the Property. The east extent of this pattern is unknown, as it is concealed along the entire west side of the Property by post-mineral Miocene gravels and basalts.

The Company has evaluated existing ground and airborne geophysical survey data which has been helpful in better defining the Fourmile structural corridor and also in identifying several other structures on the Property. The geophysical information suggests the continuation of the Fourmile structural corridor at depth below the post-mineral cover. The Fourmile zone represents a high-quality target for classic Carlin-style mineralization where it intersects the favorable lower plate carbonate stratigraphy. The available geological and geophysical information suggests that several additional prospective northwest-trending structural zones are located parallel and east of the Fourmile structural corridor. Carlin geologists are encouraged by the exploration opportunities represented by these additional geological targets.

Prior Drilling

In August/September 2012 the Company completed an initial drill program on the southwest portion of the Property. The program consisted of seven vertical reverse circulation drill holes totaling 11,720 ft. (3573 m) ranging in depth between 1,500 and 1,800 ft. (450-550 m). Drilling confirmed Carlin-type geology, alteration and geochemistry in upper plate rocks within the limited area tested, but did not test lower plate stratigraphy. This drilling did encounter the contact metamorphic effects of the Mill Canyon stock, an important feature with respect to potential for a high grade target similar to Barrick's "Fourmile" success (see below).

In 2013, in order to explore for the deeper part of the stratigraphy which hosts mineralization at the Goldrush deposit, Carlin re-entered reverse circulation drill hole CS-12-2 with a core drill rig. This hole, CS12-2C, deepened from 1,760 ft. (536 m) to 4,032 ft. (1,229 m), encountered 373 ft. (114 m) of lower plate carbonate rocks below the Roberts Mountain Thrust. Carlin-type alteration features were encountered, including decalcification, clay alteration and calcite veining.

Core hole CS12-2C intersected the upper portion of the stratigraphic section which contains gold-bearing horizons at the nearby major Cortez area deposits, confirming the excellent exploration potential at Cortez Summit. Potential is augmented by high grade drill holes at Barrick's "Fourmile" discovery, north of their Goldrush resource and located adjacent to the Cortez Summit Property. Barrick states that these holes have encountered mineralization "well above the average grade of the indicated and inferred resources at Goldrush" (Barrick Feb. 22, 2016 news release). Recent results confirm this; for example 16.6 m grading 71.6 gpt and 16.8m grading 57.9 gpt (Barrick July 26 2018 webcast). Mineralization at Fourmile is described by Barrick as being a different style than at Goldrush; it is contained in similar lower plate units, but within the contact metamorphic zone adjacent to the Mill Canyon stock. Barrick points out similarities in mineralization style to the Deep Star and Deep Post mines on the Carlin Trend, two high grade underground operations. The six westernmost reverse circulation holes drilled by Carlin at Cortez Summit have encountered contact metamorphic alteration interpreted to be related to the Mill Canyon stock. Barrick's initial "Fourmile" success means that, in addition to the classic, Carlin-type replacement style mineralization style displayed at Goldrush, Cortez Summit also has excellent potential for higher grade mineralization in rocks within and adjacent to the metamorphic aureole of the Mill Canyon stock.

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

2017 Drilling

Barrick completed a 5,171 ft. (1,576 m) vertical core hole, SJV17-1D, on the Property in May-July 2017, located along what is interpreted by Carlin geologists to be the east side of the Fourmile structural corridor SJV17-1D is located in the vicinity of Carlin's shallow holes drilled in 2012. SJV17-1D encountered a wide 567 ft. (173 m) zone at 333-900 ft. (102-274 m) in upper plate rocks consisting of variably clay-altered, iron oxide-stained, brecciated hornfels and lesser mudstone/siltstone, with the most intense clay alteration and iron oxide development at 652-798 ft. (199-243 m). Associated with this alteration is a very thick interval, 592 ft. (180 m), of highly anomalous arsenic at 328-920 ft. (100-280 m) averaging 480 ppm, with accompanying additional strongly anomalous Carlin-style pathfinder elements including mercury (to 17 ppm), antimony (to 173 ppm) and thallium (to 6.3 ppm). Gold values in this alteration zone include a 10 ft. (3 m) zone at 694-704 ft. (211-214 m) grading 2.6 gpt. The favorable lower plate carbonate section was encountered at a depth of 4,234 ft. (1,290 m) and continued to the bottom of the hole, although no significant gold values were detected.

While disappointed that the lower plate rocks encountered in SJV17-1D were not mineralized, the Company is encouraged by the strong alteration and pathfinder elements along with significant gold values encountered in upper plate rocks adjacent to the Fourmile structural corridor. The geometry of this "shallow" anomalous zone has not been defined. It potentially represents the upper level of a mineralized structural zone which could be used to guide exploration for deeper gold mineralization in lower plate carbonate rocks. A shallower silty to sandy carbonate section contained within the upper plate sequence was encountered by SJV17-1D and also in one of the early Carlin drill holes. This represents an additional potential host rock target, approximately 2,000 ft. (610 m) above the base of the Roberts Mountain Thrust.

Results of Operations

In the nine months ended September 30, 2019, the Company incurred expenditures of \$130,518 (2018-\$172,072) on exploration properties, before write-downs of \$23,455 (2018-\$42,233).

The Company's consolidated net loss for the nine months ended September 30, 2019 was \$19,777 (2018-\$119,218). In May 2019, the Company recorded a recovery of exploration costs of \$79,250, from cash and shares from the receipt of option payments on some of its Yukon properties to Fireweed. In August 2019, the Company recorded a gain on change of fair value investments of \$62,833, primarily due to the receipt of 83,333 shares of HighGold.

The Company's \$142,310 in operating costs for the nine months ended September 30, 2019 were consistent with the previous year (2018-\$156,218). The Company does not foresee a material increase to such costs for the remainder of the current year.

Management's Discussion & Analysis
 For the nine months ended September 30, 2019
 (Expressed in Canadian Dollars)

Summary of Quarterly Results

The following is a summary of certain consolidated financial information concerning the Company for each of the last eight quarters:

<i>Fiscal Quarter ended</i>	September 30 2019	June 30 2019	March 31 2019	December 31 2018
Net income (loss)	\$ 75,155	\$ 13,413	\$ (46,043)	\$ (126,426)
Net income (loss) per share	(0.00)	0.00	(0.00)	(0.00)
Total Assets	2,022,194	1,941,868	1,963,633	1,961,560

<i>Fiscal Quarter ended</i>	September 30 2018	June 30 2018	March 31 2018	December 31 2017
Net income (loss)	\$ (90,851)	\$ 24,783	\$ (53,230)	\$ (69,118)
Net income (loss) per share	(0.00)	0.00	(0.00)	(0.00)
Total Assets	1,911,787	1,966,739	1,972,579	1,942,400

In the three months ended September 30, 2019, the Company incurred expenditures of \$51,089 (2018-\$71,022) on exploration properties and write-downs of \$15,295 (2018-\$37,858).

The Company recorded net income of \$75,155 for the three months ended September 30, 2019 (2018-\$90,851 loss). The positive change to net income was due to: (a) the receipt of 83,333 HighGold shares, which contributed \$95,833 to net income, and: (b) the recovery of exploration costs of \$79,250 recorded in May 2019, based on the cash and shares received from the option of some of the Company's Yukon properties. The Company also recorded a \$35,500 gain from the increase in the fair value of its marketable securities during the quarter. For the three months ended September 30, 2019, the Company's operating expenses, were \$44,383 (2018-\$52,463). The Company's overhead costs remained at approximately the current level for the past year, and are not projected to increase for the balance of this year.

Financial Condition, Liquidity and Capital Resources

The Company's cash position at September 30, 2019, was \$18,309 (December 31, 2018 - \$47,876). At September 30, 2019, the Company had a working capital deficiency of \$275,055 (December 31, 2018 - working capital deficiency of \$243,806).

In March 2019 the Company received \$30,332 in reclamation bond refunds regarding its properties in Nevada. In May 2019, the Company received a payment of \$62,500 and 25,000 common shares from Fireweed Zinc Ltd. in connection with an option agreement between Fireweed and the Company for the purchase of a 100% interest in the Company's share of three Yukon properties owned by the Company and its joint venture partner, HighGold. In August 2019, the Company received 83,333 shares of HighGold which added \$95,833 to the value of its marketable securities at September 30, 2019.

At September 30, 2019, current assets excluding cash consisted of accounts receivable, prepaid expenses, and marketable securities which totaled \$188,856 (December 31, 2018 - \$110,127). At September 30, 2019, the Company had \$187,083 in marketable securities (December 31, 2018 - \$107,500), which represented a

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

significant component of the Company's working capital. The value of this investment is subject to market fluctuations and is therefore highly variable.

At September 30, 2019, the Company had \$482,220 (December 31, 2018 - \$401,809) in current liabilities, of which \$375,868 (December 31, 2018 - \$278,490) was due to related parties.

The Company is not in commercial production on any of its exploration and evaluation properties and accordingly, it does not generate cash from operations. The Company is dependent on raising funds through the issuance of shares, obtaining debt financing and/or attracting joint venture partners in order to undertake further exploration and development of its exploration and evaluation properties. There can, however, be no assurance the Company will be able to raise funds in the near future, in which case management may delay future exploration activities until funds become available.

Loan Payable to Related Party

In August 2018, the Company obtained a demand loan for \$65,940 (\$50,000 US) from Mr. K. Wayne Livingstone, president of the Company, for the purposes of paying claim fees that were due on the Company's US mineral properties and general working capital. The loan amount is subject to 10% interest per annum, and a total of \$3,615 interest expense has been incurred for the nine months ended September 30, 2019. In May 2019, the Company repaid an amount of \$45,551 on the loan. As at September 30, 2019, a total of \$26,497 is owing for outstanding principal and accrued interest on the loan. The loan is unsecured and payable on demand.

Off-Balance Sheet Arrangements

The Company has not entered into any off-balance sheet financing arrangements.

Proposed Transactions

There are no proposed transactions as of the date of this MD&A.

Transactions with Related Parties

Key management personnel compensation consists of the Chief Executive Officer, Chief Financial Officer ("CFO") and the Vice-President of Exploration. Aggregate compensation for the nine months ended September 30, 2019 was \$125,888 (2018 - \$124,760) for management and other fees, as described below.

The Company accrued a total of \$45,000 (2018 - \$45,000) for management and administration services to NS Star Enterprises Ltd., a company controlled by the president, during the nine months ended September 30, 2019. The Company accrued a total of \$45,000 for accounting, management and administration services to Morfopoulos Consulting Associates Ltd., a company controlled by the CFO, during the nine months ended September 30, 2019 (2018 - \$45,000). The Company paid or accrued a total of \$35,888 (2018 - \$34,760) from Mr. Robert Thomas, Vice-President of Exploration, for technical consulting and management and administration services during the nine months ended September 30, 2019.

As at September 30, 2019, a total of \$126,116 (December 31, 2018 - \$89,894) is due to director Mr. Thomas for fees, technical consulting services and expenses incurred on behalf of the Company. As at September 30, 2019, a total of \$130,000 (December 31, 2018 - \$85,000) is due to NS Star Enterprises Ltd. (a company owned by Mr. K. Wayne Livingstone) for management and administration services. As at September 30,

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

2019, a total of \$130,000 (December 31, 2018 - \$85,000) is due to Morfopoulos Consulting Associates Ltd. for accounting, management and administration services. As at September 30, 2019, a total of \$18,839 (December 31, 2018 - \$18,014) is due to Constantine for rent and Yukon joint venture expenses. All of the above amounts are unsecured, without interest or stated terms of repayment.

Outstanding Share Data

Carlin's authorized capital is an unlimited number of common shares without par value.

As at September 30, 2019 and as of the date of this report, the Company has 88,939,464 common shares outstanding.

The Company's outstanding stock options as at September 30, 2019 and as of the date of this report are as follows:

	Number	Exercise Price Weighted Average	Expiry Date
Issued in 2016	5,500,000	\$0.05	February 26, 2021
Issued in 2017	2,550,000	\$0.08	September 12, 2022
	8,050,000	\$0.06	

Management of Capital

The Company manages its cash, common shares and stock options as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. The Company does not have any externally imposed capital requirements to which it is subject.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

In order to maximize ongoing exploration efforts, the Company does not pay out dividends. The Company's investment policy is to keep its cash treasury on deposit in an interest bearing Canadian chartered bank account.

Use of Judgments and Estimates

The preparation of consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenues and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances and which form the basis of making

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Critical accounting estimates

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial period and include, but are not limited to, the following:

Share-based payments

The fair value of share-based payments is subject to the limitations of the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

Critical Accounting Judgments

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements include, but are not limited to, the following:

Going concern

The ability of the Company to continue as a going concern and meet its commitments as they become due, including completion of the acquisition, exploration and development of its mineral property interests, is dependent on the Company's ability to obtain the necessary financing. The Company will require additional capital to finance future operations and growth. If the Company is unable to obtain additional financing, the Company would be unable to continue. There can be no assurance that management's plans will be successful.

The business of mineral exploration involves a high degree of risk and there is no assurance that current exploration projects will result in future profitable mining operations. The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead, pay its liabilities and maintain its mineral property interests. The recoverability of amounts shown for exploration and evaluation properties is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of these exploration and evaluation properties, and establish future profitable production, or realize proceeds from the disposition of exploration and evaluation properties. The carrying value of the Company's exploration and evaluation properties does not reflect current or future values.

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

These matters indicate the existence of material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern. These condensed consolidated interim financial statements do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

Recovery of deferred tax assets

The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.

Functional currency

The Company applied judgment in determining its functional currency and the functional currency of its Nevada subsidiary. Functional currency was determined based on the currency in which funds are sourced and the degree of dependence by the subsidiary on the Company for financial support.

Exploration and evaluation properties

Management is required to make judgments on the status of each mineral property and the future plans with respect to finding commercial reserves. The nature of exploration and evaluation activity is such that only a few projects are ultimately successful and some assets are likely to become impaired in future periods.

Assets or cash-generating units are evaluated at each reporting date to determine whether there are any indicators of impairments. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's exploration and evaluation properties.

Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit including geologic and metallurgic information, economic assessments/studies, accessible facilities and existing permits.

Financial Instruments

Financial Assets

The Company measures its financial assets in the following categories: amortized cost, or fair value through profit or loss. The measurement depends on the purpose for which the financial assets were acquired. Management determines the measurement of financial assets at recognition.

Financial assets at amortized cost

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, these financial assets are recorded at amortized cost using the effective interest method, except for short-term receivables when the recognition of interest would be immaterial. Financial assets in this category include accounts receivable.

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

Financial assets at fair value through profit or loss ("FVTPL")

All financial assets not classified as measured at amortized cost are measured at FVTPL. Derivative financial instruments that are not designated and effective as hedging instruments are classified as FVTPL. The Company has no designated hedges. Financial instruments classified as FVTPL are stated at fair value with any changes in fair value recognized in earnings for the period. Marketable securities, derivative investments and cash and cash equivalents are included in this category of financial assets.

Impairment of financial assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

Financial liabilities

The Company classifies its financial liabilities in the following categories: other financial liabilities and financial liabilities at fair value through profit or loss.

Other financial liabilities

Other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred, and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in profit or loss over the period to maturity using the effective interest method.

Other financial liabilities are classified as current or non-current based on their maturity date. Other financial liabilities include accounts payable and accrued liabilities.

Financial liabilities at fair value through profit or loss

This category is comprised of derivative financial liabilities. Derivative financial liabilities are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting period with changes in the fair value recognized in profit or loss.

The following table summarizes the fair value hierarchy under which the Company's financial instruments are valued.

- | | |
|---------|------------------------------------------------------------------------------------------------------------------------------------------|
| Level 1 | - Unadjusted quoted prices in active markets for identical assets or liabilities; |
| Level 2 | - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and |
| Level 3 | - Inputs for the asset or liability that are not based upon observable market data. |

(Expressed in Canadian Dollars)

Risk Factors

Companies operating in the mining industry face many and varied kind of risks. Following are the risk factors most applicable to the Company.

Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they become due. The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities.

The Company is dependent on raising funds through the issuance of shares, obtaining debt financing and/or attracting joint venture partners in order to undertake further exploration and development of its mineral properties and finance office and administrative expenditures. There can be no assurance the Company will be able to raise funds in the future.

The Company has marketable securities, which are recorded as FVTPL. The Company may, from time to time, liquidate a portion of its holdings depending on market conditions and the Company's cash requirements. Depending on timing, the Company's ability to liquidate these securities is subject to price fluctuations and market conditions, which may affect the Company's ability to liquidate the securities in a timely manner.

At September 30, 2019, the Company had trade payables totaling \$79,855 (December 31, 2018 - \$54,886), which are currently due and loans payable to a related party and other amounts due to related parties totaling \$402,365 (December 31, 2018 - \$346,923).

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk on its cash. However, this risk is minimized as all amounts are held with major Canadian and American financial institutions. The Company's concentration of credit risk and maximum exposure thereto is as follows:

	September 30 2019	December 31 2018
Cash – Canada	\$ 13,743	\$39,826
Cash – USA	4,566	8,590
Total	\$ 18,309	\$ 47,876

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

The Company is not exposed to significant interest rate risk. The Company's bank accounts earn interest at variable rates. Future cash flows from interest income on cash will be affected by interest rate fluctuations.

(ii) Foreign currency risk

As at September 30, 2019, certain of the Company's financial instruments are held in US dollars. The Company has operations in Nevada, USA. As a result, the Company is exposed to foreign currency risk from fluctuations between the Canadian and US dollar.

The Company does not use derivatives or similar techniques to manage currency risk.

As at September 30, 2019, the Company is exposed to foreign currency risk on US\$3,517 (December 31, 2018 - US\$6,297) cash.

(iii) Other price risk

Other price risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from currency risk or interest rate risk. The Company's marketable securities are carried at market value and are, therefore, directly affected by fluctuations in the market value of the underlying securities. The Company's sensitivity analysis suggests that a 125% (2018 - 125%) change in market prices would change other comprehensive income/loss by approximately \$233,000 (2018 - \$238,000).

Industry

Exploring and developing mineral resource projects bears a high potential for a variety of risks. Additionally, few exploration projects successfully achieve development due to factors that cannot be predicted or foreseen. Moreover, even one such factor may result in the economic viability of a project being detrimentally impacted such that it is not feasible or practical to proceed.

Although the Company has taken steps to verify the title to exploration and evaluation properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

Metal Prices

The principal activity of the Company is the exploration and development of gold resource properties. The feasible development of such properties is highly dependent upon the price of gold. A sustained and substantial decline in commodity gold prices could result in the write-down, termination of exploration and development work or loss of its interests in identified resource properties. Although such prices cannot be forecasted with certainty, the Company carefully monitors factors which could affect gold commodity prices in order to assess the feasibility of its resource projects.

Management's Discussion & Analysis
For the nine months ended September 30, 2019
(Expressed in Canadian Dollars)

Political Risk

The resource properties on which the Company is pursuing its exploration and development activities are located in Nevada, U.S.A. and Yukon, Canada. While the political climate is considered by the Company to be stable, there can be no assurances that this will continue indefinitely. To alleviate such risk, the Company funds its Nevada operations on an as-needed basis. The Company does not presently maintain political risk insurance for its U.S. exploration projects.

Environmental

Exploration and development projects are subject to the environmental laws and regulations of the country within which the Company is conducting its operations. As such laws are subject to change, the Company carefully monitors proposed and potential changes and management believes the Company remains in compliance with current environmental regulations in the relevant jurisdictions.

Forward-Looking Statements

Some of the statements in this MD&A constitute "forward looking statements". Where Carlin expresses an expectation or belief as to future events or results, including management plans and objectives, and projections of exploration results, such expectation or belief is expressed in good faith and is believed to have a reasonable basis. The Company makes no representation that reasonable business people in possession of the same information would reach the same conclusions. While these statements represent our best current judgment, they are subject to risks and uncertainties that could cause actual results to vary, the specifics of which are detailed in disclosures with the heading "Risk Factors" in the Company's periodic filings with securities regulators. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Forward-looking statements in this MD&A are made as of the date of this MD&A or, in the case of documents incorporated by reference herein, as of the date of such documents, and Carlin does not assume the obligation to update any forward looking statement.

Approval

Mr. Robert Thomas, a director of the Company and a Qualified Person in compliance under National Instrument 43-101, has reviewed and approved the technical information contained in this report.

The Board of Directors of the Company has approved the disclosure contained in this MD&A. A copy of this MD&A will be provided to anyone who requests it.

Additional Information

Additional disclosures pertaining to the Company's technical reports, management information circulars, material change reports, press releases and other information are available on the SEDAR website at www.sedar.com.
